

Village Partners International  
partnering to help people help themselves

## Annual Report Highlights

Village Partners International is a nonprofit organization with a mission of helping others help themselves. We believe that communities are empowered by giving them the tools they will need to continue the work long after the aid has gone. Through God's grace and the generosity of our donors, we had opportunities to help many in this country and beyond in 2017. In Haiti, the small hospital was supported as well as the outreach mobile clinics and the surrounding communities where VPI supplied medications, vaccinations and care to those with nowhere else to go. Mosquito nets were purchased for protection of those in the hospital and clean water sources were built in the outlying remote areas. There, the gift of clean water reached over 7,000 people, greatly reducing the incidences of water borne disease. Funds were raised to implement a nutrition program for malnourished children and an annual medical mission team visited the village providing support and teaching for hospital staff. In Uganda, support for the pediatric clinic and safe house continued where children with malaria, malnutrition, HIV and other diseases were cared for. A mobile vaccination clinic went into the community to reach other children. Safe deliveries occurred at the maternity clinic where prenatal care and teaching were given. With the continued drought and famine of 2017, VPI was able to send funds to bridge the time until the rains returned, preventing starvation in the areas surrounding the clinics. The hurricane season of 2017 devastated the Caribbean as well as Florida and the gulf coast regions. VPI was able to send significant supplies to the US Virgin Islands, Puerto Rico and migrant workers in and around Wimauma, Florida where communities not as readily recognized by other aid organizations were served. The hard work and generosity of our donors and partners has allowed VPI to continue the mission of sharing God's hope and love throughout some of the most vulnerable parts of the world.

- Sylvia Campbell, MD President, VPI

## VPI in Papoli, Uganda

### Community Partnership PACODEF

Helping to support 45 staff & 6 volunteers

### Pediatric, Maternity and Outpatient Clinics

Support for:

Prenatal & postnatal care  
Mobile vaccination clinic  
Medicine for Miracles  
Outreach education  
Famine relief & nutrition  
Safe house for women  
Building repairs for clinic

### School Support

Daycare/Nutrition Center  
Preschool  
Primary School  
New Secondary School

### Continued Support

University of South Florida  
student internships

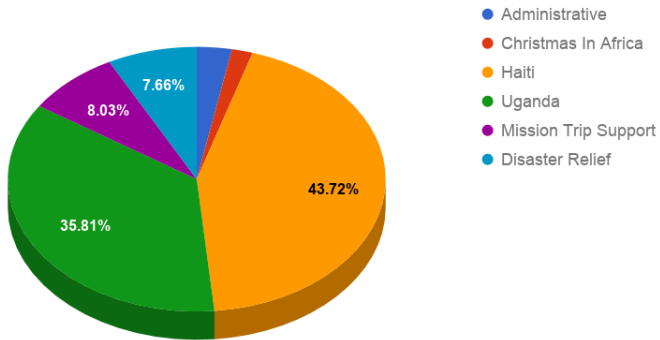

*"Over the years, Village Partners International has supported PACODEF in several projects. Most notable in 2017 was their support towards the repair of the broken water pump at Papoli Community Health Center and the installation of pipes which enabled the facility to connect to the national water pipeline. This will insure running water at the health center even when the pump breaks down. Thank you very much for your support in 2017 and we look forward to a fruitful partnership in the future."  
-PACODEF spokesperson*

**Community Health Workers in Papoli, Uganda distribute rice to families suffering during extreme drought and famine.**

### 2017 Expenditures

Total Expenditures \$214,939.19

For a comprehensive breakdown of the budget, please contact Village Partners International and we will be happy to send you a full report.

*In 2017, VPI was able to improve thousands of people's lives through the services of medical care, education, safe housing, feeding and nutrition programs, clean water, and other humanitarian assistance. By supporting the doctors, nurses and administrators, a growing stability and sustainability has been developed. Thanks to the support of our volunteers and donors, VPI will continue to partner with the poor, so that they can obtain the needed resources to create a lasting positive impact on their villages.*
