## **FROM THE BOARD**

**The mission statement of Village Partners International shares that we believe in helping others help themselves. By giving a hand up, not a handout, sustainability is reached, and the work continues long after we have gone. Even in the turmoil and pain suffered by so many in the past year, God's grace has shown throughout, allowing work to continue throughout this world. In Haiti, despite the political uncertainty and instability, teams have continued to care for the sick, the hurting, and the most vulnerable in the NE mountains. In Uganda, the community outreach, public health, child and maternity care programs connect with surrounding areas. In Tampa, those often invisible who live on our streets are given a bridge of hope. High risk children are cared for, safe deliveries occur, the elderly are treated, malnutrition is reversed, hospital care is given, food and medications are distributed, clean water is supplied, the homeless are seen, clothed and fed, and so much more. Through the partnerships fostered and the generosity of our donors, your gifts have touched the lives of those we serve as they are changed forever, and God's message of love is shared.**

**Thank you for your care for those hurting in this world.**

**Sylvia D. Campbell MD President, BOD**

# MOMBIN CROCHU, HAITI

VPI partners with Mombin Crochu Hospital to support the hospital, the malnutrition program for infants and toddlers, clean water initiatives, mobile clinics, vaccination programs and more in Mombin Crochu, Haiti. In 2023 VPI funded a group of 13 Haitian medical personnel to travel to the hospital for 1 week and perform surgery, give medical expertise and support Public Health initiatives.

## MOMBIN CROCHU HOSPITAL

2683 Patients seen  
Clean water maintained  
Centrifuge replaced; Truck repaired  
106 Safe Deliveries
